[GitHub: vladimiracuna-dev-create](#)  
[GitLab:](#)  
[vladimir.acuna.dev-group](#)  
[LinkedIn: Vladimir Acuña](#)

## SKILLS

**Backend:** PHP 8.x, Node.js, TypeScript, Python (FastAPI), Go, Rust, C#, Ruby

**Frontend:** JavaScript, HTML, CSS

**Data:** SQL Server, MySQL/MariaDB, PostgreSQL, MongoDB, Redis, SQLite, DuckDB

**DevOps/Cloud:** Docker/Compose, Kubernetes, CI/CD (GitHub Actions/GitLab CI), AWS (S3, Amplify, CloudFront), Terraform

**Quality/Security:** hardening, secret scanning (Gitleaks, TruffleHog), anti-injection, Trivy, pip-audit, OWASP ZAP, análisis forense de incidentes, análisis de logs (Apache/PHP)

**Observability:** Prometheus/Grafana

**AI/Agents:** LangGraph, MCP (Model Context Protocol), Ollama, n8n

## EDUCATION

**Computer Science and Informatics Engineering**  
University of Tarapacá (Arica)

**Business Administration Technician (Marketing specialization)**  
INACAP (Santiago)

## LANGUAGES

English (technical): fluent reading (documentation, code, papers, AI tooling).  
Conversation: basic, actively improving.

## SUMMARY

- 14 years of core experience at Fundación CEIS Maristas (2011-2025), developing, maintaining, and modernizing an educational/psychometric platform.
- Previous experience in web development and systems support for public and private institutions, focused on PHP, SQL Server/MySQL, PDF/Excel reporting, data migration, and integrations.
- Current technical portfolio with projects and labs in Docker, AWS, CI/CD, observability, and AI applied to automation, published on GitHub and GitLab.

## HIGHLIGHTED EXPERIENCE

**Fundación CEIS Maristas — Software Architect · Systems Analyst & Full-Stack Developer**  
May 2011 — October 2025

- Educational/psychometric assessment suite: **PCA** (learning), **Baterías Psicoeducativas** (social/personal development) and **Batería Online** (online platform), plus institutional mailing, LimeSurvey and WordPress.
- **Verified metrics:** 80% improvement in Bateria Online reports/load · 90% less friction in client support (2020-2025) · 45% DB/code optimization · up to 5 concurrent workstreams in certain periods.
- **2020 Pandemic:** migration of in-person services to online format in a short timeframe (cited in the recommendation letter).
- PHP 5.4 → 8.2+ modernization, refactor of critical modules, logic offloading to JavaScript, and DB duplicate cleanup.
- Mass mailing (PHP + Constant Contact) and **internal AI adoption (2024-2025)** for analysis and technical problem-solving.
- **Security:** forensic analysis of server attacks, systematic review of Apache/PHP logs to detect anomalous activity from unknown IPs, hardening with **OWASP ZAP** and load testing with **JMeter**. In-house cybersecurity talk after training during the pandemic.

Technologies: PHP, JavaScript, SQL Server, MySQL, Apache, JMeter, OWASP ZAP, Excel, FPDF/PhpSpreadsheet, Constant Contact · → [Quantified metrics and achievements from CEIS Maristas tenure](#)

## PREVIOUS CAREER (SUMMARY)

CONACE / Government of Chile (2008-2011) · E-syste (2011) · Corpvida / Servytech (2007-2008) · PointPay Chile (2006-2007) · Giro Ingeniería Ltda. (2004-2006) · European Training Center (2003-2004) · Busquesbc (2003) · Sygnum Consultores (2003) · Golden Guide Chile (2003) · Friends Defenders of Animals (2001-2002)

## SELECTED PROJECTS

- **Products with real distribution:** RootCause Windows (Rust, ETW/WPR) · RootCause Mobile (Flutter, Android/iOS) · RootCause macOS (Rust, macOS) · RootCause Web (JS, MV3) · Empresa Operativa Chile (JS, Rust, PWA) · Universal Code Scanner (Flutter, AES-256-GCM) · GabySQL (Rust, WAL) · Automa PC (Python, Playwright) · ChofyAI Studio (Tauri, Rust) · Rhino Suite (Rust/WASM, Go) · Violin Adventure (Tauri, React) · Guitarra Adventure (Tauri, React)
- **Engineering labs:** Problem-Driven Systems Lab (7 stacks) · Social Bot Scheduler (n8n, 18+ DB) · Microsistemas (PHP, MCP) · Docker Labs · WSL Labs (wslc) · Unikernel Labs (Unikraft, WSL2) · Sandbox Labs (Linux) · Proyectos AWS (GitHub) · Proyectos AWS (GitLab)
- **Applied AI:** LangGraph RealWorld (Python, 25/25) · Operational AI Agents (Python, zero-deps) · MCP + Ollama Local (FastAPI, Ollama) · Agentic Plugins Toolkit (MCP, multi-runtime) · Claude Skills Toolkit (Python, zero-deps)
- **Technical curricula:** Cybersecurity · GameDev · Data Science · Multi-Cloud · AI Evolution · Blockchain · Computational Mathematics · Business Creation · Finance & Banking · Executive Leadership · Marketing & Growth · Pedagogy · Polyglot Programming · Neural Network Labs · Machine Operator
- **Scientific and educational computing:** Human Genome Labs (TypeScript, FASTA/GFF3/VCF)
- **Code and documentation:** <https://github.com/vladimiracuna-dev-create> · <https://gitlab.com/vladimir.acuna.dev-group>

## RECENT TRAINING AND PROJECTS

- Continuous training in practical automation, ML/NLP, and development tools.
- Consolidation of a technical portfolio with cloud labs, microsystems, and recruiter-oriented documentation.

## **ATS-Optimized Version**

The following pages contain an ATS-optimized version of this resume.

- Modern hiring processes frequently use artificial intelligence and automated filters to evaluate resumes before they reach a human recruiter.
- The single-column, plain-text format on the following pages is designed to be correctly parsed by these systems, maximizing ATS compatibility.
- The content is the same — only the presentation changes to ensure no information is lost during automated processing.

The previous page is for human review. The following pages are for automated processing.

## SUMMARY

- 14 years leading the design, evolution, and operation of an educational/psychometric platform (2011-2025), with a strong focus on operational continuity.
  - Progressive modernization (PHP 5.4 → PHP 8.2+), performance optimization, and automation of PDF/Excel reports and data processes.
  - Experience with databases (SQL Server, MySQL/MariaDB) and reproducible deployments/environments using Docker and CI/CD.
  - Technical portfolio with practical cases (Cloud/AWS, microsystems, AI agents, and observability), documentation, and verifiable demos on GitHub and GitLab.
-

## EXPERIENCE

### Fundación CEIS Maristas — Software Architect and Full-Stack Developer (2011-2025)

- Design, development, and maintenance of a student assessment platform (test batteries), institutional modules, and reports.
- Technology migration (PHP 5.4 → PHP 8.2+), server/library upgrades, and performance improvements with JavaScript and load testing.
- Development of advanced PDF/Excel reports with indicators, percentiles, and analysis by class, level, and school.
- Import and migration of high-volume data from Excel with validations; automation of communications (sending, segmentation, follow-up).
- Direct support for key users (coordinators, counselors, school leaders) and production operations.
- Operational security: forensic analysis of server incidents, log monitoring and analysis (Apache/PHP) for anomaly detection, security testing with OWASP ZAP, and load testing with Apache JMeter.

Technologies: PHP, JavaScript, SQL Server, MySQL, Apache, JMeter, OWASP ZAP, Excel, FPDF/PhpSpreadsheet, Constant Contact
