

Vladimir Acuña

Solutions Architect | Senior Full-Stack | Modernization, Automation & Applied AI

Santiago, Chile | +56 9 8121 8838 | vladimir.acuna.dev@gmail.com

RECENT TRAINING AND PROJECTS

- Continuous training in practical automation, ML/NLP, and development tools.
- Consolidation of a technical portfolio with cloud labs, microsystems, and recruiter-oriented documentation.

SUMMARY

- 14 years of core experience at Fundación CEIS Maristas (2011-2025), developing, maintaining, and modernizing an educational/psychometric platform.
- Previous experience in web development and systems support for public and private institutions, focused on PHP, SQL Server/MySQL, PDF/Excel reporting, data migration, and integrations.
- Current technical portfolio with projects and labs in Docker, AWS, CI/CD, observability, and AI applied to automation, published on GitHub and GitLab.

HIGHLIGHTED EXPERIENCE

Fundación CEIS Maristas - Software Architect and Senior Full-Stack Developer 2011-2025

- Development, maintenance, and evolution of a student assessment platform, institutional modules, and reporting.
- Technology migration from PHP 5.4 to PHP 8.2+, plus server/library upgrades and performance improvements.
- PDF/Excel reports with indicators, percentiles, and analysis by class, grade level, and institution.
- Excel-based data import and migration with validations; automation of communications and follow-up processes.
- Direct support for key users (coordinators, counselors, school leaders) and production operations.

Technologies: PHP, JavaScript, SQL Server, MySQL, Apache, JMeter, Excel, FPDF/PhpSpreadsheet, Constant Contact

PREVIOUS CAREER (SUMMARY)

CONACE / Government of Chile (2008-2011) · E-syste (2011) · Corpvida / Servytech (2007-2008) · PointPay Chile (2006-2007) · Giro Ingeniería Ltda. (2004-2006) · European Training Center (2003-2004) · Busquesbc (2003) · Sygnum Consultores (2003) · Golden Guide Chile (2003) · Friends Defenders of Animals (2001-2002)

SELECTED PROJECTS

- Cloud/AWS and FinOps — GitHub + GitLab (15 AWS cases, 5-stage CI/CD)
- Microsystems — suite of 11 micro-apps, Hub CLI, MCP server
- Social Bot Scheduler — 9-axis integration matrix, 9 DB engines, n8n, Prometheus/Grafana
- Docker Labs — 12 labs, Control Center, Windows installer
- LangGraph — 25 real-world demos, Docker per case, GitHub Actions CI, stateful agents
- MCP + local Ollama — local AI chat, MCP tools, 100% private
- Unikernel Labs — Windows Control Center (WSL2 + Node.js + WinForms)
- ChofyAI Studio — macOS local AI launcher (Tauri + Rust + React)
- ('Problem Driven Systems Lab — Laboratorio de sistemas distribuido con 12 casos reales Docker-first para diagnosticar y resolver problemas críticos de rendimiento, observabilidad, resiliencia y arquitectura:', 'problem')
- ('Gabysql — ■ GabySQL · Base de datos embebida en Rust, multiplataforma, archivo único .db, WAL, API HTTP/JSON y admin web liviano. Diseñada para entornos embebidos y edge:', 'gabysql')

SKILLS

Backend: PHP 8.x, Node.js, TypeScript, Python (FastAPI), Go, Rust, C#, Ruby
Frontend: JavaScript, HTML, CSS
Data: SQL Server, MySQL/MariaDB, PostgreSQL, MongoDB, Redis, SQLite, DuckDB
DevOps/Cloud: Docker/Compose, Kubernetes, CI/CD (GitHub Actions/GitLab CI), AWS (S3, Amplify, CloudFront), Terraform
Quality/Security: hardening, secret scanning (Gitleaks, TruffleHog), anti-injection, Trivy, pip-audit
Observability: Prometheus/Grafana
AI/Agents: LangGraph, MCP (Model Context Protocol), Ollama, n8n
Own tooling (open source): Claude Skills Toolkit (Python, security-audit 12 capas, yaml-control, md-lint-fix, docker-cleanup), GabySQL (Rust, DB embebida WAL, HTTP/JSON), Python Data Science Program (197 clases ML/DL/MLOps, Flask + Windows + Android)

EDUCATION

Computer Science and Informatics Engineering
University of Tarapacá (Arica)
Business Administration Technician (Marketing specialization)
INACAP (Santiago)

LANGUAGES

English: intermediate reading; basic writing and conversation.

ATS-Optimized Version

The following pages contain an ATS-optimized version of this resume.

- Modern hiring processes frequently use artificial intelligence and automated filters to evaluate resumes before they reach a human recruiter.
- The single-column, plain-text format on the following pages is designed to be correctly parsed by these systems, maximizing ATS compatibility.
- The content is the same — only the presentation changes to ensure no information is lost during automated processing.

The previous page is for human review. The following pages are for automated processing.

SUMMARY

- 14 years leading the design, evolution, and operation of an educational/psychometric platform (2011-2025), with a strong focus on operational continuity.
 - Progressive modernization (PHP 5.4 → PHP 8.2+), performance optimization, and automation of PDF/Excel reports and data processes.
 - Experience with databases (SQL Server, MySQL/MariaDB) and reproducible deployments/environments using Docker and CI/CD.
 - Technical portfolio with practical cases (Cloud/AWS, microsystems, AI agents, and observability), documentation, and verifiable demos on GitHub and GitLab.
-

SKILLS

Backend: PHP 8.x, Node.js, TypeScript, Python (FastAPI), Go, Rust, C#, Ruby

Frontend: JavaScript, HTML, CSS

Data: SQL Server, MySQL/MariaDB, PostgreSQL, MongoDB, Redis, SQLite, DuckDB

DevOps/Cloud: Docker/Compose, Kubernetes, CI/CD (GitHub Actions/GitLab CI), AWS (S3, Amplify, CloudFront), Terraform

Quality/Security: hardening, secret scanning (Gitleaks, TruffleHog), anti-injection, Trivy, pip-audit

Observability: Prometheus/Grafana

AI/Agents: LangGraph, MCP (Model Context Protocol), Ollama, n8n

Own tooling (open source): Claude Skills Toolkit (Python, security-audit 12 capas, yaml-control, md-lint-fix, docker-cleanup), GabySQL (Rust, DB embebida WAL, HTTP/JSON), Python Data Science Program (197 clases ML/DL/MLOps, Flask + Windows + Android)

EXPERIENCE

Fundación CEIS Maristas — Software Architect and Full-Stack Developer (2011-2025)

- Design, development, and maintenance of a student assessment platform (test batteries), institutional modules, and reports.
- Technology migration (PHP 5.4 → PHP 8.2+), server/library upgrades, and performance improvements with JavaScript and load testing.
- Development of advanced PDF/Excel reports with indicators, percentiles, and analysis by class, level, and school.
- Import and migration of high-volume data from Excel with validations; automation of communications (sending, segmentation, follow-up).
- Direct support for key users (coordinators, counselors, school leaders) and production operations.
- Problem Driven Systems Lab — Laboratorio de sistemas distribuido con 12 casos reales Docker-first para diagnosticar y resolver problemas críticos de rendimiento, observabilidad, resiliencia y arquitectura
- Gabysql — ■ GabySQL · Base de datos embebida en Rust, multiplataforma, archivo único .db, WAL, API HTTP/JSON y admin web liviano. Diseñada para entornos embebidos y edge
