Professional Introduction

Professional with a degree in Computer Science Engineering, 16+ years of experience developing, maintaining, and modernizing web solutions for public and private organizations. Specialized in mission-critical systems, complex platforms, operational continuity, data quality, and performance.

Last 14 years specialized in the design, development, and evolution of an educational/psychometric platform. Combining backend, frontend, databases, advanced reports, and recently automation and Agentic AI, with a focus on resilience and observability.

Professional hallmark: Progressive Modernization — taking complex legacy systems, understanding them deeply, and evolving them toward a modern, stable, and scalable state using advanced observability, industrial resilience, cloud-native architecture (DevOps/FinOps), while always ensuring operational continuity.

Value Proposition

- Legacy system modernization (PHP 5.x → PHP 8.x, decoupled architectures)
- Design/maintenance of complex web platforms (multiple modules, large datasets, integrations with banking/payment/government)
- Optimization, Observability, Scalability (SQL tuning, Prometheus/Grafana dashboards)
- Automation, Analytics, AI (PDF/Excel reports, indicators, Agentic AI prototypes)
- Cloud and Governance/FinOps (Terraform, OIDC, AWS Budgets)
- Developer Experience/DX (Docker Labs, Hub CLI, doctor/smoke tests)
- Holistic business perspective (marketing, administration, finance studies)
- **Problem Driven Systems Lab:** Laboratorio de sistemas distribuido con 12 casos reales Docker-first para diagnosticar y resolver problemas críticos de rendimiento, observabilidad, resiliencia y arquitectura

Current Projects and Focus (Public Portfolio)

Public repositories demonstrating current capabilities:

- **Resilient Architecture & Immutable Infrastructure:** CI/CD with GitHub Actions/OIDC, Terraform, FinOps/AWS Budgets
- **Observability & DX:** Docker Labs with Prometheus/Grafana, Microsystems (Hub CLI), doctor/smoke tests
- **Agentic AI:** LangGraph v4.15 + Ollama (local AI), 25/25 operational backends (100% coverage), 8-layer hardening, Docker per case, hardened CI/CD
- **Social Bot Scheduler:** 9-axis integration matrix, 9 DB engines, n8n orchestration, Prometheus/Grafana
- **MCP + Ollama local:** Local AI chat, MCP tools, 100% private
- **Unikernel Labs:** Windows Control Center — WSL2 + Node.js + WinForms, Unikraft services
- **ChofyAI Studio:** macOS local AI launcher — Tauri + Rust + React, Apple Silicon

- MCP + Ollama: <https://github.com/vladimiracunadev-create/mcp-ollama-local>

Relevant Experience

Educational/psychometric platform (2011–2025)

- **Role:** Senior Developer / Software Architect (de facto)
- **Scope:** Educational foundation; solutions for schools and guidance teams
- Design, development, and maintenance of student assessment web platform
- Tech migration: PHP 5.4 → PHP 8.2+, JS migration for performance
- Advanced reporting modules: PDFs, charts, Excel with psychometric indicators
- Data import/migration from Excel with validation
- Communication automation: mass email (SMTP, Constant Contact), segmentation
- High-level user support
- **Technologies:** PHP 5/8, JavaScript, jQuery, HTML, CSS, SQL Server, MySQL, Apache, Linux, LimeSurvey, JMeter

Previous Experience

- **Government (CONACE):** HR systems, procurement, inventories, PDF/Excel reports, security modules
- **Financial/Payment (Transbank, PointPay, Corpvida):** GSET systems, billing, SQL Server/Oracle, VB6 COM, Crystal Reports
- **Web development for diverse organizations (Giro Ingeniería, hotels, schools):** Dynamic/static sites, intranets, surveys, educational environments

Education

- Computer Science Engineering, Universidad de Tarapacá, Arica
- Business Administration Technician (Marketing), INACAP (SAP User certification)
- Various courses: J2EE, mobile web, cybersecurity

Technical Competencies

Category	Technologies / Tools
Backend	PHP (4/5/8.x), JavaScript/Node.js, TypeScript, Python (FastAPI), Go, Rust, C#, Ruby
Frontend	HTML, CSS, JavaScript
Databases	SQL Server, MySQL/MariaDB, PostgreSQL, MongoDB, Redis, SQLite, DuckDB
Servers/Environments	Docker, Kubernetes, Linux, Windows Server, Apache
Cloud/Infrastructure	Terraform, AWS (S3, Amplify, CloudFront), OIDC, FinOps/Budgets, CI/CD (GitHub Actions/GitLab CI)
Observability	Prometheus, Grafana
Quality/Security	Hardening, secret scanning (Gitleaks, TruffleHog), anti-injection, Trivy, pip-audit
Resilience	Circuit breakers, Idempotency
AI/Automation	LangGraph, MCP (Model Context Protocol), Ollama, n8n

Category	Technologies / Tools
DX	Hub CLI, doctor/smoke tests

Work Style

- Solution and detail-oriented
- Responsible and committed
- Good communication with non-technical teams
- Continuous learning

Current Objective

Join a team where I can contribute my experience in system modernization, full-stack development, and platform operations, contributing to high-impact projects with a focus on quality, resilience, and continuous improvement.
