SKILLS

Backend: PHP 8.x, Node.js, TypeScript, Python (FastAPI), Go, Rust, C#, Ruby

Frontend: JavaScript, HTML, CSS

Data: SQL Server, MySQL/MariaDB, PostgreSQL, MongoDB, Redis, SQLite, DuckDB

DevOps/Cloud: Docker/Compose, Kubernetes, CI/CD (GitHub Actions/GitLab CI), AWS (S3, Amplify, CloudFront), Terraform

Quality/Security: hardening, secret scanning (Gitleaks, TruffleHog), anti-injection, Trivy, pip-audit

Observability: Prometheus/Grafana

AI/Agents: LangGraph, MCP (Model Context Protocol), Ollama, n8n

EDUCATION

Computer Science and Informatics Engineering
University of Tarapacá (Arica)

Business Administration Technician (Marketing specialization)
INACAP (Santiago)

LANGUAGES

English (technical): fluent reading (documentation, code, papers, AI tooling).
Conversation: basic, actively improving.

SUMMARY

- 14 years of core experience at Fundación CEIS Maristas (2011-2025), developing, maintaining, and modernizing an educational/psychometric platform.
- Previous experience in web development and systems support for public and private institutions, focused on PHP, SQL Server/MySQL, PDF/Excel reporting, data migration, and integrations.
- Current technical portfolio with projects and labs in Docker, AWS, CI/CD, observability, and AI applied to automation, published on GitHub and GitLab.

HIGHLIGHTED EXPERIENCE

Fundación CEIS Maristas — Software Architect · Systems Analyst & Full-Stack Developer
May 2011 — October 2025

- Educational/psychometric assessment suite: **PCA** (learning), **Baterías Psicoeducativas** (social/personal development) and **Batería Online** (online platform), plus institutional mailing, LimeSurvey and WordPress.
- **Verified metrics:** 80% improvement in Batería Online reports/load · 90% less friction in client support (2020-2025) · 45% DB/code optimization · up to 5 concurrent workstreams in certain periods.
- **2020 Pandemic:** migration of in-person services to online format in a short timeframe (cited in the recommendation letter).
- PHP 5.4 → 8.2+ modernization, refactor of critical modules, logic offloading to JavaScript, and DB duplicate cleanup.
- Mass mailing (PHP + Constant Contact) and **internal AI adoption (2024-2025)** for analysis and technical problem-solving.

Technologies: PHP, JavaScript, SQL Server, MySQL, Apache, JMeter, Excel, FPDF/PhpSpreadsheet, Constant Contact · → [Quantified metrics and achievements from CEIS Maristas tenure](#)

PREVIOUS CAREER (SUMMARY)

CONACE / Government of Chile (2008-2011) · E-syste (2011) · Corpvida / Servytech (2007-2008) · PointPay Chile (2006-2007) · Giro Ingeniería Ltda. (2004-2006) · European Training Center (2003-2004) · Busquesbc (2003) · Sygnum Consultores (2003) · Golden Guide Chile (2003) · Friends Defenders of Animals (2001-2002)

SELECTED PROJECTS

- Cloud/AWS and FinOps — GitHub + GitLab (15 AWS cases, 5-stage CI/CD)
- Microsystems — suite of 11 micro-apps, Hub CLI, MCP server
- Social Bot Scheduler — 9-axis integration matrix, 9 DB engines, n8n, Prometheus/Grafana
- Docker Labs — 12 labs, Control Center, Windows installer
- LangGraph — 25 real-world demos, Docker per case, GitHub Actions CI, stateful agents
- MCP + local Ollama — local AI chat, MCP tools, 100% private
- Unikernel Labs — Windows Control Center (WSL2 + Node.js + WinForms)
- ChofyAI Studio — macOS local AI launcher (Tauri + Rust + React)
- ('Problem Driven Systems Lab — 12 desafíos × 5 stacks = 60 casos operativos Docker-first para diagnosticar y resolver problemas críticos de rendimiento, observabilidad, resiliencia y arquitectura:', 'problem')
- ('Claude Skills Toolkit — claude-skills-toolkit · Skills agentic para Claude Code · security-audit (12 capas: OSV/KEV/EPSS/SAST/...) · yaml-control · md-lint-fix · docker-cleanup · Zero-deps por defecto · Cross-platform:', 'claude')
- ('Gabysql — GabySQL · Base de datos embebida en Rust, multiplataforma, archivo único .db, WAL, API HTTP/JSON y admin web liviano. Diseñada para entornos embebidos y edge:', 'gabysql')

RECENT TRAINING AND PROJECTS

- Continuous training in practical automation, ML/NLP, and development tools.
- Consolidation of a technical portfolio with cloud labs, microsystems, and recruiter-oriented documentation.

ATS-Optimized Version

The following pages contain an ATS-optimized version of this resume.

- Modern hiring processes frequently use artificial intelligence and automated filters to evaluate resumes before they reach a human recruiter.
- The single-column, plain-text format on the following pages is designed to be correctly parsed by these systems, maximizing ATS compatibility.
- The content is the same — only the presentation changes to ensure no information is lost during automated processing.

The previous page is for human review. The following pages are for automated processing.

SUMMARY

- 14 years leading the design, evolution, and operation of an educational/psychometric platform (2011-2025), with a strong focus on operational continuity.
 - Progressive modernization (PHP 5.4 → PHP 8.2+), performance optimization, and automation of PDF/Excel reports and data processes.
 - Experience with databases (SQL Server, MySQL/MariaDB) and reproducible deployments/environments using Docker and CI/CD.
 - Technical portfolio with practical cases (Cloud/AWS, microsystems, AI agents, and observability), documentation, and verifiable demos on GitHub and GitLab.
-

SKILLS

Backend: PHP 8.x, Node.js, TypeScript, Python (FastAPI), Go, Rust, C#, Ruby

EXPERIENCE

Fundación CEIS Maristas — Software Architect and Full-Stack Developer (2011-2025)

- Design, development, and maintenance of a student assessment platform (test batteries), institutional modules, and reports.
- Technology migration (PHP 5.4 → PHP 8.2+), server/library upgrades, and performance improvements with JavaScript and load testing.
- Development of advanced PDF/Excel reports with indicators, percentiles, and analysis by class, level, and school.
- Import and migration of high-volume data from Excel with validations; automation of communications (sending, segmentation, follow-up).
- Direct support for key users (coordinators, counselors, school leaders) and production operations.
- Problem Driven Systems Lab — 12 desafíos × 5 stacks = 60 casos operativos Docker-first para diagnosticar y resolver problemas críticos de rendimiento, observabilidad, resiliencia y arquitectura
- Claude Skills Toolkit — claude-skills-toolkit · Skills agentic para Claude Code · security-audit (12 capas: OSV/KEV/EPSS/SAST/...) · yaml-control · md-lint-fix · docker-cleanup · Zero-deps por defecto · Cross-platform
- Gabysql — GabySQL · Base de datos embebida en Rust, multiplataforma, archivo único .db, WAL, API HTTP/JSON y admin web liviano. Diseñada para entornos embebidos y edge
- Python Data Science Program — 232 clases en 9 partes: Python, ML, Deep Learning, MLOps, ingeniería de datos. Lab Flask + apps Windows nativa (PySide6/Qt) y Android (Expo SDK 51)

Technologies: PHP, JavaScript, SQL Server, MySQL, Apache, JMeter, Excel, FPDF/PhpSpreadsheet, Constant Contact
