GitLab: vladimir.acuna.dev-group
LinkedIn: Vladimir Acuña

SKILLS

Backend: PHP 8.x, Node.js, TypeScript, Python (FastAPI), Go, Rust, C#, Ruby

Frontend: JavaScript, HTML, CSS

Data: SQL Server, MySQL/MariaDB, PostgreSQL, MongoDB, Redis, SQLite, DuckDB

DevOps/Cloud: Docker/Compose, Kubernetes, CI/CD (GitHub Actions/GitLab CI), AWS (S3, Amplify, CloudFront), Terraform

Quality/Security: hardening, secret scanning (Gitleaks, TruffleHog), anti-injection, Trivy, pip-audit, OWASP ZAP, análisis forense de incidentes, análisis de logs (Apache/PHP)

Observability: Prometheus/Grafana

AI/Agents: LangGraph, MCP (Model Context Protocol), Ollama, n8n

EDUCATION

Computer Science and Informatics Engineering
University of Tarapacá (Arica)

Business Administration Technician (Marketing specialization)
INACAP (Santiago)

LANGUAGES

English (technical): fluent reading (documentation, code, papers, AI tooling). Conversation: basic, actively improving.

SUMMARY

• 14 years of core experience at Fundación CEIS Maristas (2011-2025), developing, maintaining, and modernizing an educational/psychometric platform.
• Previous experience in web development and systems support for public and private institutions, focused on PHP, SQL Server/MySQL, PDF/Excel reporting, data migration, and integrations.
• Current technical portfolio with projects and labs in Docker, AWS, CI/CD, observability, and AI applied to automation, published on GitHub and GitLab.

HIGHLIGHTED EXPERIENCE

Fundación CEIS Maristas — Software Architect · Systems Analyst & Full-Stack Developer

May 2011 — October 2025

• Educational/psychometric assessment suite: **PCA** (learning), **Baterías Psicoeducativas** (social/personal development) and **Batería Online** (online platform), plus institutional mailing, LimeSurvey and WordPress.
• **Verified metrics**: 80% improvement in Batería Online reports/load · 90% less friction in client support (2020-2025) · 45% DB/code optimization · up to 5 concurrent workstreams in certain periods.
• **2020 Pandemic**: migration of in-person services to online format in a short timeframe (cited in the recommendation letter).
• PHP 5.4 → 8.2+ modernization, refactor of critical modules, logic offloading to JavaScript, and DB duplicate cleanup.
• Mass mailing (PHP + Constant Contact) and **internal AI adoption (2024-2025)** for analysis and technical problem-solving.
• **Security**: forensic analysis of server attacks, systematic review of Apache/PHP logs to detect anomalous activity from unknown IPs, hardening with **OWASP ZAP** and load testing with **JMeter**. In-house cybersecurity talk after training during the pandemic.

Technologies: PHP, JavaScript, SQL Server, MySQL, Apache, JMeter, OWASP ZAP, Excel, FPDF/PhpSpreadsheet, Constant Contact · → *Quantified metrics and achievements from CEIS Maristas tenure*

PREVIOUS CAREER (SUMMARY)

CONACE / Government of Chile (2008-2011) · E-syste (2011) · Corpvida / Servytech (2007-2008) · PointPay Chile (2006-2007) · Giro Ingeniería Ltda. (2004-2006) · European Training Center (2003-2004) · Busquesbc (2003) · Sygnum Consultores (2003) · Golden Guide Chile (2003) · Friends Defenders of Animals (2001-2002)

SELECTED PROJECTS

• **Products with real distribution:** RootCause Windows (Rust, ETW/WPR) · RootCause Mobile (Flutter, Android/iOS) · RootCause macOS (Rust, macOS) · RootCause Web (JS, MV3) · Empresa Operativa Chile (JS, Rust, PWA) · Universal Code Scanner (Flutter, AES-256-GCM) · GabySQL (Rust, WAL) · Automa PC (Python, Playwright) · ChofyAI Studio (Tauri, Rust) · Rhino Suite (Rust/WASM, Go) · Violin Adventure (Tauri, React) · Guitarra Adventure (Tauri, React) · RootCause QR Inspector (Flutter, Dart) · RootCause Server (Rust, 18 rules) · PDF Reader (Flutter, Android/Windows/Web) · Decentraland Social Arcade (SDK7, ECS, TypeScript) · Commerce OS (Web, Windows, Android) · Video Transcript Studio (Whisper, Windows)
• **Engineering labs:** Problem-Driven Systems Lab (7 stacks) · Social Bot Scheduler (n8n, 18+ DB) · Microsistemas (PHP, MCP) · Docker Labs · WSL Labs (wslc) · Unikernel Labs (Unikraft, WSL2) · Sandbox Labs (Linux) · Proyectos AWS (GitHub) · Proyectos AWS (GitLab) · Universal Payments Engineering Lab (payments, ledger) · AWS Desktop Studio (Electron, AWS CLI) · RootCause Blockchain Security (CLI, local API) · RootCause Bitcoin Defense (UTXO, regtest) · QEMU/KVM Labs (QEMU, KVM, libvirt) · Framework Ecosystems Labs (12 ecosystems, CI)
• **Applied AI:** LangGraph RealWorld (Python, 25/25) · Operational AI Agents (Python, zero-deps) · MCP + Ollama Local (FastAPI, Ollama) · Agentic Plugins Toolkit (MCP, multi-runtime) · Claude Skills Toolkit (Python, zero-deps) · Codex Skills Toolkit (Python, pnpm) · AI Dataset Foundry (Windows, Android)
• **Technical curricula:** Cybersecurity · GameDev · Data Science · Multi-Cloud · AI Evolution · Blockchain · Computational Mathematics · Business Creation · Finance & Banking · Executive Leadership · Marketing & Growth · Pedagogy · Polyglot Programming · Neural Network Labs · Machine Operator · Architecture & Built Environment (Python, Markdown) · Database Systems Labs (27 DB engines) · Lifelong Learning Ecosystem (30 paths, 6 areas) · Modern Software Engineering Program (Python, GitHub Pages)
• **Scientific and educational computing:** Human Genome Labs (TypeScript, FASTA/GFF3/VCF) · Chilean School Learning Path (Python, HTML) · Psychometrics & Assessment (Python, 57 tests) · Pañuelo al Viento (Flutter, Android/Windows)
• **Code and documentation:** https://github.com/vladimiracunadev-create · https://gitlab.com/vladimir.acuna.dev-group

RECENT TRAINING AND PROJECTS

• Continuous training in practical automation, ML/NLP, and development tools.
• Consolidation of a technical portfolio with cloud labs, microsystems, and recruiter-oriented documentation.

ATS-Optimized Version

The following pages contain an ATS-optimized version of this resume.

• Modern hiring processes frequently use artificial intelligence and automated filters to evaluate resumes before they reach a human recruiter.

• The single-column, plain-text format on the following pages is designed to be correctly parsed by these systems, maximizing ATS compatibility.

• The content is the same — only the presentation changes to ensure no information is lost during automated processing.

The previous page is for human review. The following pages are for automated processing.

SUMMARY

• 14 years leading the design, evolution, and operation of an educational/psychometric platform (2011-2025), with a strong focus on operational continuity.

• Progressive modernization (PHP 5.4 → PHP 8.2+), performance optimization, and automation of PDF/Excel reports and data processes.

• Experience with databases (SQL Server, MySQL/MariaDB) and reproducible deployments/environments using Docker and CI/CD.

• Technical portfolio with practical cases (Cloud/AWS, microsystems, AI agents, and observability), documentation, and verifiable demos on GitHub and GitLab.

SKILLS

Backend: PHP 8.x, Node.js, TypeScript, Python (FastAPI), Go, Rust, C#, Ruby
Frontend: JavaScript, HTML, CSS
Data: SQL Server, MySQL/MariaDB, PostgreSQL, MongoDB, Redis, SQLite, DuckDB
DevOps/Cloud: Docker/Compose, Kubernetes, CI/CD (GitHub Actions/GitLab CI), AWS (S3, Amplify, CloudFront), Terraform
Quality/Security: hardening, secret scanning (Gitleaks, TruffleHog), anti-injection, Trivy, pip-audit, OWASP ZAP, análisis forense de incidentes, análisis de logs (Apache/PHP)
Observability: Prometheus/Grafana
AI/Agents: LangGraph, MCP (Model Context Protocol), Ollama, n8n

EXPERIENCE

Fundación CEIS Maristas — Software Architect and Full-Stack Developer (2011-2025)

• Design, development, and maintenance of a student assessment platform (test batteries), institutional modules, and reports.

• Technology migration (PHP 5.4 → PHP 8.2+), server/library upgrades, and performance improvements with JavaScript and load testing.

• Development of advanced PDF/Excel reports with indicators, percentiles, and analysis by class, level, and school.

• Import and migration of high-volume data from Excel with validations; automation of communications (sending, segmentation, follow-up).

• Direct support for key users (coordinators, counselors, school leaders) and production operations.

• Operational security: forensic analysis of server incidents, log monitoring and analysis (Apache/PHP) for anomaly detection, security testing with OWASP ZAP, and load testing with Apache JMeter.

Technologies: PHP, JavaScript, SQL Server, MySQL, Apache, JMeter, OWASP ZAP, Excel, FPDF/PhpSpreadsheet, Constant Contact
